Alexa Setup Instructions

Things you will need (we assume Amazon Alexa is already configured):

Access to e-mail address and password for account creation/verification

Alexa Device (Dot, Echo, Show ...)

Your Amazon Account information

Our_Smart_Home Alexa Skill

Compatible Apple or Android device and App Store Login Information

Download/Install ComfortBase App

Search for "Comfort Base" and download the WiFi App from the App Store.

Configure Comfort Base WiFi App

Open App

Allow Notifications

Enter E-mail address (or Phone Number) and Password to login or click Register

To Register:

Note:

Write Password down to be used again

Click Send Code

Enter Verification code sent from e-mail or Text Message

Add New Device (Comfort Base) to WiFi App:

Place Comfort Base into AP Mode by pushing SYNC button on side of Comfortbase 4

Consecutive times

Open the Comfort Base WiFi App

Click the "+" sign to add a device

Verify the Comfort Base is in AP Mode (flashing red around the Sync Button)

Choose the correct home WiFi router name and type in the proper password

Click "Go to Settings"

Put Settings		R I 10054

Return to the Comfort Base WiFi App

App will automatically show "Config" on screen for about 20 seconds (Please be Patient during Configuration set up)

"Edit Device Name" will appear on the screen. Please enter a name for your ComfortBase. This will be the name Alexa uses for Voice Commands so your should keep it simple.

Edit device name		
Bed		
ОК		

Type the name you would like to assign to your Comfort Base.

Verify the new Device Name says "Device Online"

	All Device	+		
Glideaway				
e ultite	Bed Device Online			

Click New Device Name and verify the Comfort Base responds to commands

Add the ComfortBase Skill to Alexa

Open the Alexa App

Choose the Menu icon in the upper left of the screen

Click "Skills"

Search for the skill "our_smart_home"

Click on "Our_Smart_Home"

Choose "Enable"

Login with same credentials used when setting up the ComfortBase App

Do You Authorize alexa-skill?	
yes	

Choose "Yes" to Authorize Alexa Skill

Do You Authorize alexa-skill?

yes

Verify the screen shows "Successfully Linked"

Click the "X" in the upper right of screen to close it

Wait 20-30 seconds for it to discover the ComfortBase device

Verify 70+ "devices" were added (these are all the commands that will control your Comfortbase)

Test your connection by saying "Alexa, turn on (Base Name) head up"
